

FACT SHEET

Re:Build 2026

Upgrading Today for a Net-zero Future

Show Name: THE NOVA Expo 2026
Gross Area: Approx. 10,700 sq.m.
Show Days: Wed 3 - Fri 5 June 2026
Operating Hours: 10.00 - 19.30
Expo Venue: EH101-102 BITEC

Organizer by: EEC Academy
Parking: 4,100 cars and 102 buses
Expecting Visitors: 12,000 people

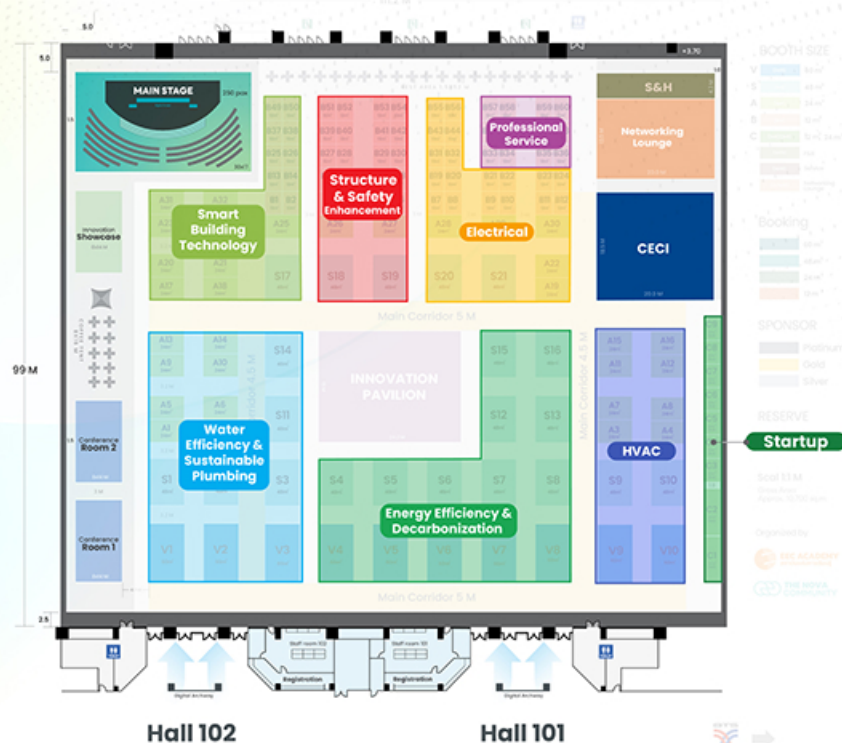

Why Exhibit at Re:Build 2026?

Lead the transformation of Thailand's built environment. As the premier platform for building modernization and sustainable infrastructure in Thailand, **Re:Build 2026** offers unparalleled opportunities to:

- **Connect Directly with Key Local Buyers:** Meet thousands of Thai building owners, developers, facility managers, architects, engineers, and contractors actively seeking solutions to upgrade their existing properties across the nation.
- **Showcase Your Local Innovation:** Position your cutting-edge technologies and services at the forefront of Thailand's net-zero revolution and urban regeneration.
- **Drive Strategic Market Growth:** Generate high-quality leads, forge robust partnerships, and secure new projects within Thailand's rapidly expanding market for high-performance building retrofits.
- **Influence Thai Industry Standards:** Be a vital part of the local conversation, shaping the future of sustainable and intelligent development across Thailand.

Re:Build 2026 is where the urgent need for climate action meets practical, profitable solutions for Thailand's unique market. This expo is not about theoretical possibilities; **it's about proven strategies and technologies ready for immediate implementation to unlock prime value in existing assets, especially those in Thailand's prime urban centers.**

Exhibitor Profiles by Zone:

Position your brand strategically within one of our focused zones, ensuring maximum exposure to your target audience:

Zone 1: HVAC Systems

The Heart of Healthy & Efficient Buildings

- **Who Exhibits Here:** Manufacturers and suppliers of advanced heating, ventilation, and air conditioning technologies.
- **Showcase Your Expertise In:** High-efficiency chillers, VRF systems, indoor air quality solutions (filtration, purification), smart thermostats and advanced controls, energy recovery ventilators (ERVs), and essential HVAC accessories like duct sealing and insulation.

Zone 2: Energy Efficiency & Decarbonization Solutions

Building a Net-Zero Future

- **Who Exhibits Here:** Companies offering comprehensive solutions for energy reduction and carbon footprint minimization.
- **Showcase Your Expertise In:** Innovative financial models like Cooling as a Service (Caas) & ESCOs, high-performance building envelopes (advanced insulation, windows, doors, intelligent shading, air sealing), renewable energy integration (Solar PV, solar thermal, wind, battery storage, grid services), sustainable materials (recycled content, low-VOC finishes), transformative façade renovations (cladding, curtain walls, green walls), and advanced roofing systems (cool roofs, green roofs, durable materials).

Zone 3: Water Efficiency & Sustainable Plumbing

Conserving Our Most Precious Resource

- **Who Exhibits Here:** Providers of intelligent water management systems and sustainable plumbing solutions.
- **Showcase Your Expertise In:** Low-flow fixtures (toilets, urinals, faucets, showerheads), greywater & rainwater harvesting systems, advanced leak detection & smart water monitoring, cutting-edge water treatment & filtration technologies, and high-efficiency hot water systems (on-demand, solar hot water).

Zone 4: Smart Building Technology & Digital Transformation

The Intelligent Building Brain

- **Who Exhibits Here:** Innovators in building automation, IoT, AI, and digital infrastructure.
- **Showcase Your Expertise In:** Integrated Building Management Systems (BMS/BAS) for holistic control, a wide range of Internet of Things (IoT) sensors (environmental, occupancy, asset tracking), powerful data analytics & AI platforms (predictive maintenance, energy optimization, space utilization, tenant experience), Digital Twin solutions, and crucial cybersecurity for Operational Technology (OT/IT).

Zone 5: Structural Integrity & Safety Enhancements

Foundations of Resilience & Security

- **Who Exhibits Here:** Suppliers of solutions for enhancing building strength, safety, and security.
- **Showcase Your Expertise In:** Seismic retrofitting (structural reinforcement, foundation strengthening), modern fire safety systems (alarms, sprinklers, smoke control, emergency lighting), resilient building materials (fire-rated, impact-resistant, flood protection), advanced access control & security systems (CCTV, intruder alarms), and universal accessibility solutions (elevators, lifts, ramps, automatic doors).

Zone 6: Electrical Systems

Powering the Modern Building

- **Who Exhibits Here:** Providers of cutting-edge electrical infrastructure, lighting, and power management solutions.
- **Showcase Your Expertise In:** Energy-efficient LED lighting systems, smart lighting controls, daylight harvesting technologies, solutions for power quality and harmonic filtering, and high-efficiency equipment replacement such as generators and transformers.
