

Key Pillars of Re:Build 2026: Solutions for Every Building

Discover innovations designed to **Revitalize** • **Retrofit** • **Revolutionize** your assets:

• Energy Efficiency & Decarbonization Solutions:

- Reduce consumption, slash emissions. Explore high-performance envelopes, renewable integration (Solar PV, BESS), smart facades, sustainable materials, and advanced CaaS/ESCO models.

• Indoor Environmental Quality (IEQ) – Air, Light, Water:

- Elevate human experience and well-being. See cutting-edge HVAC for clean air, smart water management (harvesting, leak detection, treatment), and optimized electrical systems for health.

• Smart Building Technology & Digital Transformation:

- Optimize performance through automation and data. Featuring integrated BMS/BAS, advanced IoT sensors, AI-driven analytics, digital twins, and robust cybersecurity for OT/IT.

• Structural Integrity & Safety Enhancements:

- Ensure ultimate resilience and security. Solutions for seismic retrofitting, comprehensive fire safety, resilient materials, integrated access control, and universal accessibility.

• Professional Services:

- Support your journey with expert energy auditing, innovative design & fit-out, skilled contractors & project management, strategic financial institutions, and leading certification bodies.

Scalable Solutions for Every Building Type: From residential to commercial, small to large – **Re:Build 2026** offers adaptable solutions for urban regeneration and creating a sustainable legacy worldwide.
